iOS 15.4

When iOS 15.4 is released it will add a new feature will allow Face ID to be used with a mask and without an Apple Watch for authentication.

Apple says that the feature can "recognize the unique features around the eye" for authentication purposes. If you opt to use this feature during setup, you will need to rescan your face for Face ID. From there, Face ID will be able to unlock your iPhone even when you're wearing a mask.

In the Settings app, there's will be a new "Use Face ID with a Mask" toggle that can be turned on or off if you change your mind about the mask, and there's a new feature to "Add Glasses" to make Face ID more accurate when you're wearing glasses and a mask at the same time.

Great Charger

USB C Charger, Anker 32W 2 Port Charger with 20W USB C Power . For iPad/iPad Mini, and iPhone. At Amazon.

A COOL TRICK!

Back tapping your iPhone

How to "Turn on Back Tap"

Check that you have the latest version of iOS on your iPhone 8 or later.

Go to Settings > Accessibility > Touch, and tap Back Tap.

Tap Double Tap or Triple Tap and choose an action.

Double or triple tap on the back of your iPhone to trigger the action you set.

You can set it to turn on the flash light, camera or many other functions

< Back Tap Double Tap
